What's changing in 4th Edition

Across the Working Groups, changes are focused on:

- Scope and Essential Performance
- User environments and intended use
- Software and PEMS
- International wireless coexistence expectations
- EMF exposure concepts
- Hazard-based structure

How to use this kit

1. Brief leadership using the podcast as the shared baseline.
2. Revisit your intended use, user environments, and understand the changing scope of the standard now.
3. Assign owners to track the Working Groups most relevant to your product.
4. Track areas likely to affect: QMS documentation, labeling and IFUs, test strategy and planning, design impacts, and your impact register.
